Queen's University

Bachelor of Applied Science, Computer Engineering

Kingston, ON

Sept 2023 – Apr 2028

- **Awards:** Ruddell-Albert Award (**\$60,000**) - Academic Excellence, 2023
- **Relevant coursework:** Data Structures, OOP, Computer Architecture, Digital Systems, Software Dev Methodology, Operating Systems, Algorithms, Databases
- General Member, **Queen's High-Performance Computing:** Trained **large-scale deep learning models** using **PyTorch Distributed Data Parallel (DDP)** on the CAC HPC cluster for AI/ML research and competition preparation

EXPERIENCE

Agentic AI Implementation Engineer

Sun Life

Toronto, ON

Jul 2026 – Jan 2027

- Build a centralized reporting dashboard (**HTML, CSS, JavaScript**) that consolidates program and delivery data across 5+ cohorts, using **Python ETL scripts** to transform Excel data into **JSON**, version-controlled via **Bitbucket**
- Explore the **BMAD framework** and **agentic AI methodologies** through coursework and hands-on experimentation to inform AI strategy initiatives

Digital Analytics Intern

Sun Life

Toronto, ON

May 2026 – May 2027

- Perform **data analysis** for stakeholders by building **Martech dashboards** and custom **Adobe Analytics** reports, components, and data visualizations
- Validate **Tealium iQ** tag upgrades and **Web SDK** implementations for **accurate data collection** across company websites
- Develop an **AI agent** and **prompt library** for Adobe Analytics data analysis and insight generation using **Microsoft Copilot Agent Builder**, **prompt engineering**, and structured AI **output evaluation testing**
- Optimize Adobe Analytics health by cleaning segments, updating processing rules, and auditing **eVars/props**

Software Developer

Queen's Engineering Society Software Development Team

Kingston, ON

Sept 2025 – Apr 2026

- Developed a **real-time interactive display** providing weather, transit routes, events, room availability, news, and a photo booth using a Raspberry Pi 5 and IR touch frame; **responds in <1s** of input received from JavaScript to API
- Built a **full-stack application** using **React, HTML/CSS, Node.js, Flask, JavaScript**, and third-party APIs; containerized using **Docker** and deployed via **Vercel**, improving deployment speed by **40%** and maintaining **99% uptime**
- Applied **team-based SDLC practices** and **CI/CD** to design, prototype, and integrate hardware and software components

Web Developer

Royal LePage Signature Realty

Toronto, ON

May 2025 – Aug 2025

- Built a **production real estate website** using **WordPress, HTML/CSS, JavaScript, PHP**, and **MySQL** with **CREA DDF® (IDX)** to automate all listings; configured **SSL/TLS** and monitored website traffic with **Google Analytics** to improve engagement

PROJECTS

Autonomous Vehicle System | YOLOv8, Raspberry Pi, PiCar-X, Labellmg, TensorFlow, Coral, Python

Jan 2024 – Apr 2024

- Built an **autonomous Raspberry Pi car** with camera input, **motor control** (GPIO/PWM), and **real-time decision logic** to detect traffic signs with **>90% confidence** in field conditions
- **Trained** a custom **YOLOv8 object detection model**, optimizing preprocessing (grayscale), and accelerating edge inference via **TensorFlow Lite** on **Google Coral**, reducing inference latency to **<200ms per frame**

Hydroponic Garden Monitor | React, React Native, JSON, HTTP, Node.js, Expo Go, Arduino, IoT

Sep 2024 – Dec 2024

- Built a **sensor-integrated** hydroponic garden for campus use using an **Arduino**, applying **Agile Scrum** practices
- Developed a **React Native mobile** application integrating **real-time sensor data** via HTTP APIs to monitor pH levels, temperature, and camera visuals

Human Activity Recognition | Python, scikit-learn, Tkinter, Pandas, HDF5

Jan 2025 – Apr 2025

- **Preprocessed** 100Hz accelerometer data with **noise reduction** and 5-second **segmentation**; engineered statistical features for **model training**
- **Trained** and **deployed** a **logistic regression classifier** (94% accuracy, AUC 0.98) in a Tkinter app for **real-time** CSV classification and visualization

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, JavaScript, Verilog, Assembly (Nios II), VHDL

Libraries: NumPy, Matplotlib, Pandas, PyTorch (YOLOv5/8), scikit-learn, Bootstrap, HTML, CSS

Tools: React, React Native, Flask, Node.js, Bash, REST APIs, Git, Docker, Qt, Jira, Confluence, Arduino, Raspberry Pi, FPGA
