Education

Queen's University Kingston, ON

Bachelor of Applied Science, Computer Engineering *Sept 2023 – Apr 2028*

- **Awards:** Ruddell-Albert Award **($60,000)** - Academic Excellence, 2023
- **Relevant coursework:** Data Structures, OOP, Computer Architecture, Digital Systems, Software Dev Methodology, Operating Systems, Algorithms, Databases
- General Member, **Queen's High-Performance Computing**: Trained **large-scale deep learning models** using **PyTorch Distributed Data Parallel (DDP)** on the CAC HPC cluster for AI/ML research and competition preparation

Experience

Agentic AI Implementation Engineer Toronto, ON

Sun Life *Jul 2026 — Jan 2027*

- Build a centralized reporting dashboard **(HTML, CSS, JavaScript)** that consolidates program and delivery data across 5+ cohorts, using **Python ETL scripts** to transform Excel data into **JSON**, version-controlled via **Bitbucket**
- Explore the **BMAD framework** and **agentic AI methodologies** through coursework and hands-on experimentation to inform AI strategy initiatives

Digital Analytics Intern Toronto, ON

Sun Life *May 2026 — May 2027*

- Build **Martech dashboards** and perform **data analysis** for stakeholders by building custom **Adobe Analytics** reports, components, and data visualizations
- Validate **Tealium iQ** tag upgrades and **Web SDK** implementations for **accurate data collection** across company websites
- Develop an **AI agent** and **prompt library** for Adobe Analytics data analysis and insight generation using **Microsoft Copilot Agent Builder**, Sun Life Asks, **prompt engineering**, **custom skills**, and structured AI **output evaluation testing**
- Optimize Adobe Analytics health by cleaning segments, updating processing rules, and auditing **eVars/props**

Software Developer Kingston, ON

Queen's Engineering Society Software Development Team *Sept 2025 — Apr 2026*

- Developed a **real-time interactive display** providing weather, transit routes, events, room availability, news, and a photo booth using a Raspberry Pi 5 and IR touch frame; **responds in <1s** of input received from JavaScript to API
- Built a **full-stack application** using **React**, **HTML/CSS**, **Node.js**, **Flask**, **JavaScript**, and third-party APIs; containerized using **Docker** and deployed via **Vercel**, improving deployment speed by **40%** and maintaining **99% uptime**
- Applied **team-based SDLC practices** and **CI/CD** to design, prototype, and integrate hardware and software components

Web Developer Toronto, ON

Royal LePage Signature Realty *May 2025 — Aug 2025*

- Built a **production real estate website** using **WordPress**, **HTML/CSS**, **JavaScript**, **PHP**, and **MySQL** with **CREA DDF® (IDX)** to automate all listings; configured **SSL/TLS** and monitored website traffic with **Google Analytics** to improve engagement

Projects

Autonomous Vehicle System | *YOLOv8, Raspberry Pi, PiCar-X, LabelImg, TensorFlow, Coral, Python* *Jan 2024 – Apr 2024*

- Built an **autonomous Raspberry Pi car** with camera input, **motor control** (GPIO/PWM), and **real-time decision logic** to detect traffic signs with **>90% confidence** in field conditions
- **Trained** a custom **YOLOv8 object detection model**, optimizing preprocessing (grayscale), and accelerating edge inference via **TensorFlow Lite** on **Google Coral**, reducing inference latency to **<200ms per frame**

Hydroponic Garden Monitor | *React, React Native, JSON, HTTP, Node.js, Expo Go, Arduino, IoT* *Sep 2024 – Dec 2024*

- Built a **sensor-integrated** hydroponic garden for campus use using an **Arduino**, applying **Agile Scrum** practices
- Developed a **React Native mobile** application integrating **real-time sensor data** via HTTP APIs to monitor pH levels, temperature, and camera visuals

Human Activity Recognition | *Python, scikit-learn, Tkinter, Pandas, HDF5* *Jan 2025 – Apr 2025*

- **Preprocessed** 100Hz accelerometer data with **noise reduction** and 5-second **segmentation**; engineered statistical features for **model training**
- **Trained** and **deployed** a **logistic regression classifier** (94% accuracy, AUC 0.98) in a Tkinter app for **real-time** CSV classification and visualization

Technical Skills

Languages: Python, Java, C/C++, SQL, JavaScript, Verilog, Assembly (Nios II), VHDL

Libraries: NumPy, Matplotlib, Pandas, PyTorch (YOLOv5/8), scikit-learn, Bootstrap, HTML, CSS

Tools: React, React Native, Flask, Node.js, Bash, REST APIs, Git, Docker, Qt, Jira, Confluence, Arduino, Raspberry Pi, FPGA
